

Notes 1

What is Markdown?

- A lightweight text formatting language
- Lets you write formatted text (headings, lists, links, code) using plain text symbols
- Commonly used for README files, documentation, and notes because it's easy and write

What is Git?

- A version control system
- Tracks changes to files over time so you can revert, compare, or collaborate safely
- Widely used by developers and IT teams to manage source code and configs

What is GitHub?

- A cloud-based platform that hosts Git repositories
- Allows collaboration, backups, issue tracking, and project management
- Often used for sharing code, open-source projects, and school/work assignments

What is Slack?

- A team communication platform
- Organizes conversations into channels
- Commonly used in workplaces and schools instead of long email chains
